

Description

Nickel 200 is a commercially pure, un-alloyed nickel with useful mechanical properties and strong resistance to corrosive environments. At high temperatures, Nickel 200 retains much of its strength, while at subzero temperatures it is tough and ductile.

Applications

Fuel cells, battery plates, electronic parts, transducers, aerospace components.

PHYSICAL PROPERTIES

Density	8.89 g/cm ³
Curie temperature	360°C
Melting point	1446°C
Specific heat	0.24 J/g°C
Thermal coefficient of expansion (25°C to 100°C)	13 x 10 ⁻⁶ /°C

MECHANICAL PROPERTIES

	Annealed sheet	Annealed rods and bars
Tensile strength	380 MPa	380 MPa
Yield strength	100 MPa	105 MPa
Elongation	40%	40%
Modulus of elasticity	204 GPa	

THERMAL & ELECTRICAL PROPERTIES - ANNEALED

Temperature °C	Mean linear expansion (from 21°C to temp shown) µm/m · K	Thermal conductivity W/m · K	Electric resistivity nΩm
-253	8.5	–	–
-184	10.4	–	27
-129	11.2	77.2	43
-73	11.3	–	58
-18	–	72.1	80
21	–	–	95
93	13.3	67.1	126
204	13.9	61.3	188
316	14.4	56.3	273

FORMS AVAILABLE:

Coil

Sheet

More than just metal

We're one of Europe's leading suppliers of premium quality refractory metals and alloys, soft magnetic alloys, and controlled expansion alloys. We hold a large stock of UK-certified, materials, all with full chain custody. With a deep technical understanding, comprehensive workshop facilities, and top accreditations, we help our customers get more from their materials.

Knowledge and advice

Our team understands exactly how our products are made, how they will behave in different situations, and how they should perform. Their knowledge and expertise helps save time, effort and cost by ensuring that all materials are sourced, processed and tested to perform in the most effective way.

We partner with leading academic institutions and scientific organisations that add value to our service and help develop solutions to the challenges impacting our customers. We're keen to share these unique insights in order to deliver practical operational improvements.

Workshop and machining

Our purpose-built facilities are centred around a fully equipped workshop designed to address almost any customer request:

- CNC Proturn RLX 1630 lathe for high precision rod and bar processing
- Saws to cut bars, plate and billets from Ø 2mm to Ø 270mm
- Guillotines for sheet and coil
- Grinding machinery
- De-coiler to check for imperfections before shipping
- Coil handling equipment to inspect product before dispatch
- Water jet and laser cutting
- Heat treatments

Quality control

All orders are fully tested before shipping.

Our state-of-the-art metrology lab features:

- Micrometers, verniers and gauges for all applications
- Surface roughness tester
- Straightness and roundness testing apparatus
- Magnetometers for measuring inductance, coercive and saturation
- Capabilities for evaluating properties such as CTE, tensile and elongation.

Best practice

We are committed to continuous improvement, reflected in our achievement of internationally-recognised industry accreditations. These are the foundation of best practice and provide you with solid assurances of competence and integrity:

- **AS9120** certified – a top aerospace industry award.
- **Green Mark level 1** accreditation – an environmental certification that supports greater sustainability.
- **JOSCAR** (the Joint Supply Chain Accreditation Register) accredited – an award that helps to streamline procurement processes.
- **Cyber Essentials** certified – a government-backed programme that provides security assurance of a supplier's digital infrastructure.

Discover how we can **optimise** operational performance
